ABOUT

Chemical Engineer and transformation leader. From engineering to executive management across four multinationals — leading over 50 initiatives in Operational Excellence, Digital Transformation, and Continuous Improvement.

In less than 10 years, I evolved from trainee to executive manager across four major multinationals, leading increasingly complex operations and teams in the manufacturing industry. I have led over 50 transformation initiatives in multinational companies, delivering significant gains in productivity, quality, safety, availability, operational efficiency, and business value generation.

Key results include reducing operational inefficiency from 12% to 2% at Michelin through process restructuring and performance management; increasing operational capacity by 130% at Moove using VOC and Design Thinking; and reducing scrap by 50% at Knauf through BPMN, Lean Manufacturing, and DMAIC.

My leadership combines strategic thinking, analytical capability, and a strong execution orientation. I use Lean Manufacturing, Six Sigma Green Belt, BPMN, DMAIC, Design Thinking, and VOC as means to generate impact. I believe excellent processes only produce consistent results when supported by a strong culture, prepared leadership, and engaged teams.

I am currently seeking opportunities in Continuous Improvement Management, Business Transformation, and Manufacturing Excellence leadership positions.

EXPERIENCE

Operations Manager

Michelin

Aug 2024 - Present · 2 years

Strategic leadership of industrial operations in a high-complexity environment, driving operational transformation initiatives focused on operational excellence, performance management, leadership development, and business value generation.

- Led an operational transformation that reduced production inefficiency from 12% to 2% in just two months through process restructuring, performance management, and team integration.
- Managed the strategic investment portfolio (CAPEX and OPEX), prioritizing initiatives based on financial return, operational impact, and business alignment — achieving over R\$ 1M in OPEX reduction.
- Led transformation projects focused on productivity increase, loss reduction, process optimization, and industrial efficiency using Lean Manufacturing, BPMN, data analysis, and structured continuous improvement methodologies.
- Structured performance management routines based on strategic indicators (SQCDMP), strengthening data-driven decision-making, operational governance, and result predictability.
- Worked cross-functionally with Production, Engineering, Quality, Logistics, and Maintenance, promoting stakeholder alignment and accelerating strategic initiative implementation.
- Developed leadership and strengthened high-performance culture through close management, development plans, continuous feedback, and indicator monitoring — resulting in two employees promoted to managers.

Regional Continuous Improvement Specialist

Knauf Brasil

Jan 2023 - Aug 2024 · 1 yr 8 mos

Corporate role leading Business Transformation and Operational Excellence initiatives, driving strategic projects focused on process standardization, digitalization, continuous improvement, and operational efficiency across different business units.

- Structured and implemented the company's process architecture using BPMN, promoting standardization, governance, and greater integration between business areas.
- Led operational transformation initiatives that reduced industrial scrap by 50% through Lean Manufacturing, DMAIC, data analysis, and continuous improvement, ensuring sustainable results.
- Conducted organizational diagnostics using Voice of Customer (VOC) and NPS to identify improvement opportunities and direct initiatives aligned with business needs.
- Acted as a facilitator of the operational excellence culture, training teams and leadership in Lean Manufacturing, continuous improvement, and process management.
- Managed cross-functional projects involving different stakeholders, promoting strategic alignment, change management, and disciplined execution of transformation initiatives.
- Led the digitalization and evolution of corporate processes, increasing operational efficiency, information reliability, and data-driven decision-making capability.

Production and Maintenance Coordinator

Gerdau

Sep 2022 - Jan 2023 · 5 months

Started my industrial leadership trajectory as coordinator, managing production operations, team development, and strengthening operational discipline in a high-complexity industrial environment.

- Managed operational teams, promoting safety, people development, and continuous improvement, ensuring production, quality, and performance targets.
- Coordinated production activities, ensuring operational stability, process standardization, and adherence to performance indicators.
- Worked with cross-functional areas to solve operational problems, eliminate waste, and increase production process efficiency.
- Developed performance monitoring routines through operational indicators, supporting decision-making and corrective/preventive actions.

Process Engineer

Arkema-ArrMaz

Jun 2022 - Aug 2022 · 3 months

Production Supervisor

Moove

Mar 2021 - Jul 2022 · 1 yr 5 mos

Began my leadership trajectory managing operational teams and production performance, driving operational transformation initiatives focused on productivity, safety, quality, and people development.

- Led the complete restructuring of a production process using Voice of Customer (VOC) and Design Thinking, increasing operational capacity by 130% without significant infrastructure investments.
- Managed multidisciplinary teams, promoting people development, safety culture, and continuous improvement, aligning team performance with strategic operational goals.
- Structured performance management routines based on operational indicators, strengthening data-driven decision-making and action plan execution discipline.

Continuous Improvement Analyst

Moove

Aug 2018 - Feb 2021 · 2 yrs 7 mos

Responsible for leading continuous improvement initiatives focused on productivity increase, process optimization, and business value generation, working cross-functionally with operational areas.

- Led continuous improvement projects using Lean Manufacturing, VOC, Design Thinking, and structured methodologies for waste elimination and operational efficiency increase.

- Conducted process analysis, bottleneck identification, and sustainable solution implementation, supporting the evolution of operational performance indicators.
- Worked with Production, Engineering, Quality, and Maintenance areas, promoting stakeholder alignment and accelerating improvement initiative implementation.

Trainee

Moove

Jan 2017 - Aug 2018 · 1 yr 8 mos

Undergraduate Researcher

Catalyst Laboratory - UFRRJ

Nov 2012 - Jul 2014 · 1 yr 9 mos

- Synthesized catalysts and performed analysis using TPD, X-RAY, ASAP 2010 and catalytic tests in chromatograph.
- Part of a Petrobras project focused on finding larger pores for zeolites used in crude-oil catalysis.

EDUCATION

Bachelor's in Chemical Engineering

Universidade Federal Rural do Rio de Janeiro

2011 – 2020

Chemical Engineering degree with solid foundation in data analysis, quality control, and unit operations optimization. Thesis focused on innovation in automotive grease production process.

Sandwich Exchange Program — Science Without Borders

Syracuse University

Aug 2014 – Jan 2016

One and a half years studying chemical engineering courses in New York. Participated in a consulting project for a small business, structuring the business model and strategic plan.
